

# EuroForm® PJet 100

## Total print and imaging control

### EuroForm PJet 100 bridges the information gap to Pcounter from your HP LaserJet and multi function printers (MFPs).

Just monitoring the usage of network printers and MFPs has obvious benefits for deploying and managing your printers. Assigning, controlling, and recovering print costs by projects, departments, users, or clients can make an important contribution to your business processes. If you decided on Pcounter to accomplish all or some of these objectives, you appreciate its install-once, network-oriented approach to print tracking, accounting and management. But you may also be wondering how you can integrate the full imaging and printing usage information from your HP LaserJet and multi function printers (MFPs).

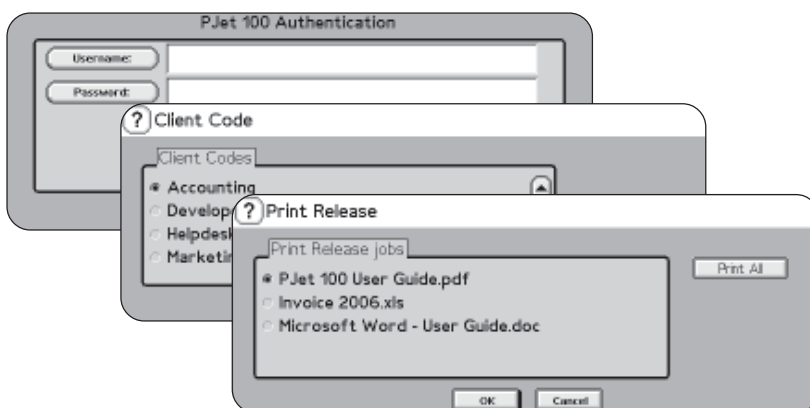

EuroForm PJet 100 runs on HP LaserJet printers and MFPs to implement Pcounter access management and to capture printing and imaging information for Pcounter reporting and accounting. This enables centralized control of and consistent data from all your printers.

## How does it work?

The EuroForm PJet 100 applet runs on the embedded virtual machine in HP LaserJet printers and MFPs. It uses TCP/IP to connect to the EuroForm PJet 100 Gateway Service. EuroForm PJet 100 can retrieve and update the user account information that controls access to selected functionalities, as well as logging and transmitting back usage information on printing, copying, digital sending, etc. The audit trail is secure, and once in Pcounter, the information can be retrieved by user or printer, categorized by number of jobs, number of pages, hourly/daily page counts, and so on.

Optionally the Pcounter Web Report (PWR) - a 100% web-based Report Builder application which works in conjunction with the Pcounter software - offers a large choice of print/copy traffic and cost reports.

A dedicated management tool simplifies centralized configuration and management for all printer and MFP devices equipped with EuroForm PJet 100 clients.

## Characteristics

- Seamless integration to Pcounter – the intelligent document accounting solution
- Full print release capabilities ensuring security and confidentiality of output on network attached MFP devices
- Project costing and client billing support ensuring that all output is accounted for and charged back where appropriate
- User authentication directly from device
- LDAP and Active Directory support

## Areas of application

- Providing information for the accurate assessment of printing and imaging volumes: enabling optimal deployment of printing and imaging devices, and eliminating waste and misuse
- Collecting a total account of who prints, copies or sends, where they do it and when
- Help manage and enforce defined printing and imaging policies
- As part of a cost recovery scheme for academic and professional services

## Special features

System requirements:

- Microsoft Windows Server 2003
- Windows XP Professional
- Windows 2000 Professional or Server (Service Pack 3 or later required)
- Pcounter PRO

## Supported printers and MFPs

Please check the EuroForm PJet 100 section of the EuroForm homepage at <http://www.euroform.com> for an up to date list of supported printers and MFP devices.

## Ordering information

Part Number	Description
EF-PJ1001A	EuroForm Solution Manager - Gateway to Pcounter PRO
EF-PJ1010A	EuroForm PJet 100 - HP MFP Client
EF-PJ1100M	Maintenance 1 year, 20%
